

MULTIPLE GUARDING ABILITY IN ONE GATE

EXCLUSIVELY MANUFACTURED BY TraXdor Cape

T1
HIGH SECURITY

T2
PREMIUM SECURITY

▼ STRUCTURAL GUARD:

- NEW IMPROVED!** A uniquely designed interlocking system with multiple protection lips. No leverage points make it virtually impossible to tamper with the lock.
- Security grade aluminium provides crucial structural strength.
- Vertical aluminium tubes are inserted into the main tubes to secure all ends of the crosses onto the main tubes.
- Pre-treated and powder coated aluminium 'multi-guard' the gate from nature's elements.

▼ MECHANICAL GUARD:

- NEW IMPROVED** top and bottom rail!
- Unique rotating bolt system guides the gate in the bottom rail and automatically adjusts in height to prevent the gate from getting stuck on uneven surfaces.
- Operates on solid bearings in the top track.
- Direct locking for instant security.
- The T1 gate operates with a single three row cross system for medium to high security purposes while the T2 gate operates with a double two row and one single row system for higher security purposes.
- Optional also as a non-sliding barrier (fixture).

▼ NEW! ELECTRONIC GUARD:

- The wireless alarm is build into the gate at various locations to eliminate predictability.
- Designed to intelligently discard false alarms.
- The following can be implemented as optional features:
 - Complies with most home alarm systems and can be added wireless to your existing alarm system.
 - An additional "stand-alone" wireless siren can be added in absence of an existing home alarm system.

▼ OUTSTANDING FEATURES

- NEW** Smooth and silent sliding action through multiple brushes implemented inside the top rail.
- Custom manufactured to the customers requirements.
- Manufactured to comply for both window and door applications.
- Powder coated in a multiple range of colours.
- Fully framed.
- The gate occupy only 17% of the full expandable opening when folded down.

both
your
windows
and
doors
THE
MOST
SUPERIOR
WAY**

Since 2007 Traxdor has been manufacturing quality sliding trellis burglar proofing for both doors and windows to secure your home and business. The Traxdor factory is situated in Mossel Bay, Western Cape to deliver a quick and prompt service to our customers. Our products are distributed throughout South Africa by our own independent agents who will also assist you with a full risk assessment to meet your requirements. The materials we use in our manufacturing process will ensure maximum strength and a lifetime of use with minimum maintenance.
